Subject: Comments on November 2007 Draft Industrial Stormwater
General Permit

Dear Mr. Klikoff

The Boeing Company appreciates the opportunity to comment on the November 2007 revised version of the February 2007 draft Industrial Storm Water General Permit. This draft permit revision appears to continue the trend to increase permit complexity and stringency without any indication that the actions taken have clear environmental benefit. Attachment one is a recommendation to create scientifically supportable measurement of results within the context of the permit.

The Boeing Company's April 20th 2007 comments on the February 2007 draft permit are still applicable to this latest revision and are included as Attachment 2. Boeing has reviewed and concurs with the comments provided by the Association of Washington Business and the Weyerhaeuser Company. Our technical comments on specific sections of the permit are provided in Attachment 3.

Please contact me or Mel Oleson (253) 988-0378 if you have questions.
