

CATCHING RAIN:

Low Impact Development & Green Stormwater Strategies

for Real Estate Professionals

A FREE Workshop from WSU Extension with 7.5 Clock Hours

Low Impact Development (LID), or Green Stormwater Infrastructure (GSI), requirements for new construction and redevelopment are coming soon in many cities and counties across the state. Learn about these stormwater management techniques and why new requirements are being put in place, as well as how the changes may affect you and your clients. Development and green-industry professionals, along with experts from WSU Extension are providing a series of cutting edge training workshops across the state.

Dates, Times & Locations:

Workshops Run 8:30 a.m. – 4:30 p.m.

TUES., MAY 28 Vancouver, Department of Ecology Vancouver Field Office

WED., MAY 29 Bremerton, WSU Kitsap County Extension

MON., JUNE 3 Puyallup, WSU Puyallup Resource and Extension Center

WED., JUNE 5 Olympia, LOTT WET Science Center

TUES., JUNE 11 Bellingham, WSU Whatcom County Extension

WED., JUNE 12 Everett, WSU Snohomish County Extension

MON., JUNE 17 Spokane, WSU Spokane County Extension

TUES., JUNE 18 Ellensburg, Kittitas Valley Event Center

These FREE Workshops will Provide:

- ✓ 7.5 clock hours for real estate brokers and appraisers
- ✓ Cutting-edge knowledge of stormwater-management techniques and regulations & marketing approaches
- ✓ 90-minute field trip for a hands-on look at LID/GSI features
- ✓ Networking with regional colleagues
- ✓ Free lunch with 30-minute lunch break; great snacks

Topics Covered Include:

- ✓ Best Management Practices for Low Impact Development (LID)–both required and voluntary; techniques include rain gardens, pervious pavements, catchment, and more
- ✓ Latest information on federal, state, and local regulations
- ✓ How LID/GSI can save developers money
- ✓ How LID/GSI can solve water runoff problems on existing sites
- ✓ Working with clients and title companies when LID features are on site or needed
- ✓ Marketing and appraisal overview of LID
- ✓ Lessons learned in the industry
- ✓ Maintenance requirements for the different LID/GSI techniques
