Subject: Don't let business interests destroy your tough rules on run-off
Date: Wednesday, February 01, 2012 8:51:53 AM

Don't let developers and business interests delay the process or make it entirely voluntary. We need to crack down on storm water pollution now. We can't wait and risk the viability of entire salmon populations. Please enact tough rules that are easy to understand and scientifically sound. Please give everyday people the tools necessary to make changes on their land so that we can collectively reduce the storm water related pollution inputs to the Puget Sound.

Thanks for your time!
