**Subject:** clarification on item in Appendix I-F

Rachel –

On page F-1 of App I-F, the “area” feasibility criterion for rain gardens isn’t crystal-clear. Does the “minimum vertical separation” clause apply only to less than  $\frac{3}{4}$  acre of pervious surface, or to all of the preceding text. I believe that the semicolons indicate this, but I wanted to be sure of Ecology’s intent. As a early Christmas present of a comment, Ecology might consider using bullets in paragraphs like this.

Thanks

*Bill*
