

Workshop Description

This is a one-day class to train local government staff who are adopting the 2005 *Stormwater Management Manual for Eastern Washington*. Douglas Howie, Ecology stormwater engineer, will be the primary instructor for the workshop.

The Workshop will:

- Emphasize how to review Stormwater Site Plans (SSP) for proposed new development and redevelopment projects.
- Provide an overview of the relevant Phase II Municipal Stormwater Permit requirements.
- Explain how to use the 2004 *Stormwater Management Manual for Eastern Washington* to review a Stormwater Site Plan for consistency with Core Elements such as source controls, on-site management, treatment and flow control.
- Use two case studies to explain the details associated with reviewing a SSP.
- Provide tips about how to review a Construction Stormwater Pollution Prevention Plan (CSWPPP).
