Karen

In reviewing the draft permit document I noticed one thing that could be improved on from a presentation point. When defining an acronym such as SWMP, NPGIS or PGIS it would help if the words making up the acronym were capitalized so they stand out from the general text. An example on page 13 of Appendix 2 is "...pollutant generating impervious (PGIS) surface areas." It would read better if it was "...Pollutant Generating Impervious Surface (PGIS) areas."

Thanks,

Don

Of those to whom much is given, much is expected.
