Dear Karen Dinicola

Thank you for taking public comments on stormwater permits for Eastern Washington. It is my opinion that this program is way over due I would like to see Walla Walla county; City of Walla Walla and City of College Place all be required to take part in this new program. The only system we have now is King of the hill. College Place is at the bottom of the hill. All storm water flows at or through College Place. The past construction development in the city of Walla Walla has left storm water flooding problems in College Place. There is little one city can do about what goes on in side another city. Even less as home owner who gets this storm water trespassing on our property.

Department of Ecology has no power over storm water at this time unless it stirs up the mud. With out the state giving some teeth to the Department of Ecology this problem of stormwater will never get any city to care. Its sad that the only morels a city has is to its tax base and that stops at the city limits sign.

Thank you for your time
