Ms. Dincola,

I'm Tim Connor, the Sierra Club's Spokane River/Aquifer conservation representative in Spokane. You may have already caught this but, in looking at your 7/13/05 fact sheet on the preliminary draft Phase II stormwater permit for Eastern Washington, I noticed that both the Spokane River and Hangman Creek (both subject to important TMDLs) were not on the list of TMDL's reviewed for the permit. Since stormwater is discharged to both, I saw this as an omission that I should bring to your attention. If there is a substantive reason why neither is on the list, p. 12 of the fact sheet, I'd appreciate learning about it.

regards, Tim Connor
