Determining Need for Coverage under Municipal Stormwater Permits in WA State

1. Do you operate an MS4 in Washington State?
   - No
   - Yes

   All of the following are true:
   a) At least some of the water in your MS4 is from non-agricultural runoff or drainage.
   b) You are located outside of Federal Land (incl. military).
   c) You are not a federally recognized Indian Tribe in Indian Country Lands.
   d) You are not WSDOT.

   (At least one statement does not describe you)

2. Are you located in a Phase I jurisdiction (Seattle, Tacoma, Unincorporated Snohomish, King, Pierce, or Clark Counties)?
   - No
   - Yes

3. Is all or part of your MS4 is in a designated Phase II City or regulated portion of a County (See maps and Listing at S1.D.2.a)
   - No
   - Yes

4. Are any of these conditions true:
   - Your MS4 contributes substantially to pollutant loading of a physically interconnected MS4 regulated under this permit.
   - Discharge from the MS4 identified as cause of impairment.
   - An EPA-approved TMDL identifies necessary s/w controls on the MS4.

   MUNICIPAL STORMWATER PERMIT COVERAGE MAY NOT BE NEEDED AT THIS TIME.
   No further action may be needed.

5. Do you serve* a total population of at least 1000 people?
   - No
   - Yes

   *including resident and commuter populations

YOU ARE REQUIRED TO OBTAIN COVERAGE UNDER A MUNICIPAL STORMWATER PERMIT. For info, see: www.ecy.wa.gov/programs/wq/stormwater/municipal/secondary.html

MS4s operated by the following are not required to obtain coverage under stormwater permits issued by Washington State on 1-17-07:
