---

Carrie:

Volume 1-Section 2.5.7-page 2-33 allows a detention exemption; described better in bullet 5 and 6 in Appendix I-E for Flow Control Exempt Surface Waters. Both are important to Fife as the Erdahl and Fife ditches are connected to saltwater discharge pump stations; stormwater utility rate payers and DD#23 participants pay to maintain these facilities. Ecology published a detention exemption map showing the Erdahl Basin boundaries using our 2002 Stormwater Comp Plan as the reference based on personal conversation with Ed Obrien; we would like that map updated to include the drainage area of the Fife Ditch Basin also.

Thanks,

Ken Gill, P.E.
