

CLEAN SAMISH INITIATIVE

-- Incentives, Requirements, & Opportunities

“Clean water is everyone’s business!”

The Clean Samish Initiative’s governmental, non-profit, and business partners, invite you to an important community meeting on December 3rd. Find out how to do your part, and share your thoughts with your neighbors at this lively *Open House* meeting--featuring Samish-area made refreshments.

Earlier this year a water quality improvement plan was presented to the community and actions are underway. However more effort is needed to reduce pollution problems in the Samish Watershed. The presence of high amounts of fecal bacteria fails Washington’s Water Quality Standards and remains a threat for human contact and ingestion of contaminated foods. These bacteria also indicate the possible presence of long-lived viruses.

Take pride in your watershed. We invite your opinions about how well efforts so far are working and *how, what, or where* more attention is needed. **Please join us for an evening of brief presentations & open discussions.**

THURSDAY DECEMBER 3rd--Open House @ 6:30 p.m., Program @ 7:00
Allen Elementary School Gym, 17145 Cook Rd. (W. of Chuckanut Dr.)
