Subject: comments-TMDL, Make Spokane River Clean & Healthy!

I strongly urge you to : 1. Tell EPA to abide by the Clean Water Act!- Require ID to Reduce phosphorus discharge, same as WA, 2. Ensure compliance ASAP & 3. NO discharges permits (city or county-Spokane, or anyone else) until the above is resolved!

You work for citizens, not industry! Do your job!- Protect Our Public lands, waters & wildlife! ^ Phosphorus ='s algae blooms, low O2, dead zones/fish. This is NOT acceptable!

Your attention to this most urgent matter would be much appreciated by all present & future generations of all species.

Thank you Lydia Garvey 429 S 24th Clinton OK 73601
