Subject: Water usage in Clallam County

Dear Ms. Wessel,

The Department of Ecology (DOE) is proposing a number of significant limitations on water usage in our area.

I am concerned that these limitations will ultimately stifle development, decrease land values, adversely impact the business-generated and real estate-related tax bases, and, likely, result in lawsuits over what could be construed as a government "taking" of land. Lastly, and perhaps more important, they will deprive citizens of the right to use their land in keeping with traditions established over many years.

I request that you delay the implementation of these rules until such time as you can convince the affected population - as well as our elected representatives - that these rules are logical, lawful, and beneficial by means of a thorough, independently performed economic study.

Thank you for your attention.

**Sincerely,
Carolyn Money**
