Subject: Questions regarding Proposed Rule for WRIA 17 Quilcene-Snow Water Resources Management Program

1. What is the relationship of the Department of Ecology's proposed rule to United Nations Agenda 21 program(s)?
2. What written, verbal and/or electronic direction has been given by Mr. Jay Mannign to Ms. Ann Wessel and/or her associates/subordinates at the Department of Ecology regarding the Proposed Rule for WRIA 17 Quilcene-Snow Water Resources Management Program?
3. What relationship exists now or existed in the past between the Department of Ecology and the Washington Environmental Council with regard to Proposed Rule for WRIA 17 Quilcene-Snow Water Resources Management Program ?
4. Why, according to Ms. Ann Wessel's presentation to the people of Jefferson County, are these questions and all of the questions asked, from my recollection, starting in August of 2005, being answered only at the point in time when the rule is being, has been approved?
5. What is the Department of Ecology's policy written and/or unwritten regarding public comment?

There are many other questions.

Respectfully sbmitted,

Richard Hild
