I certify that the information presented in this application is correct to the best of my knowledge. I volunteer to uphold the standards of EnviroStars by properly managing and reducing hazardous waste. If my business/organization no longer meets program certification requirements, I will notify my EnviroStars representative. I will also refrain from promoting my business/organization as an EnviroStar, and from using the EnviroStars logo in promotional efforts until the issue is resolved. I understand that the use of the EnviroStars brand is a privilege and that the EnviroStars program maintains full rights to the logo and its use.

## ENVIROSTARS SELF CERTIFICATION GOAL SHEET

- Requirement:** Write a goal for the year related to being a "greener" business. Select a goal to reduce hazardous material use, minimize wastes, recycle more, or increase energy efficiency. Be as specific as possible. Think about the steps you will take, a timeline, and who will be responsible.

To qualify as a 3-Star EnviroStar you need to complete the Self Certification Checklist and Return to Compliance (RTC) Plan, if a question indicates you should. A few compliance questions from the Self Certification Checklist that require an RTC plan, and select others that require additional research and purchase of equipment may be used to satisfy your annual goal. Ecology has approved a list of compliance questions that may be used to satisfy your goal. You'll need to contact your local EnviroStars representative to discuss any compliance goal related to a specific checklist question before you include it in your application. *Please see Appendix A in the Auto Body Technical Assistance Manual for contact information.*

**TIP: For ideas, look at the 4-Star and 5-Star certification requirements on our website at <http://www.envirostars.org/worksheets.cfm>, and choose from those.**

**EXAMPLE Goals:**

1. *Update vendor contracts to identify and preference lowest VOC and least-hazardous paint primers, sealers, topcoats and specialty coating.*
2. *Install secondary containment for all dangerous waste accumulation areas to contain spills and leaks.*
3. *Purchase closed, re-circulating gun washer equipment by August 2009.*
4. *Create a map of all drains on-site and where they go.*

**Write your annual goals here:**
