

## WATER RESOURCES PROGRAM

### Showing of Compliance with RCW 90.44.100(3)

Water Right Certificate or Permit Number: \_\_\_\_\_

Parcel tax identification number: \_\_\_\_\_

Landowner(s) name: \_\_\_\_\_

Part of complying with RCW 90.44.100(3) is for the project proponent to notify the Department of Ecology (Ecology) that the statutory criteria of RCW 90.44.100(3) have been satisfied. Please attach to this document the water well report for the additional or replacement well and any additional information you have to support your affidavit.

#### **Affidavit:**

I, \_\_\_\_\_, do certify that I caused the well described in the attached water well report to be drilled as an additional or replacement well(s) for use under Water Right Number \_\_\_\_\_. This notice and attached documents describe and support my assertion that the replacement or additional well(s) complies with RCW 90.44.100(3) (a-g) and RCW 90.44.100(4):

#### **Please check one:**

- This is an additional well (Attach well log)
- This is a replacement well (Attach well log for new well & Decommissioning log for old well)
- a. The well is an additional or replacement well(s) that will tap the same body of public ground water as the original well;
  - b. If a replacement well is constructed, the use of the original well(s) shall be discontinued and the original well(s) shall be properly decommissioned;
  - c. The combined withdrawal of water from the additional or replacement well(s) and the original well authorized by the water right certificate does not enlarge the water right conveyed by the original water right certificate to the extent the certificate has been developed (perfected) and maintained by use of water;
  - d. The construction and use-of the additional or replacement well(s) does not interfere with or impair water rights with an earlier priority date;
  - e. The additional or replacement well(s) is located no closer than the original well to a well or surface water body it might interfere with;
  - f. A specified manner of construction for the additional or replacement well(s) has been complied with, if required, and the new well was constructed in compliance with chapter 18.104 RCW and chapter 173-160 WAC;
  - g. The additional or replacement well(s) is located within the area described as the point of withdrawal in the public notice published for the original application for water right, or the most current legal description published for the right. Both the original well and the additional or replacement well(s) are located in \_\_\_\_\_ (legal description).

Therefore the well is in compliance with the requirements for a statutorily granted amendment to the water right permit or certificate.

*I understand the acceptance of this affidavit, and any attachments, by the Department of Ecology shall not be construed as affirming the validity of any water right permit or certificate. The responsibility to comply with RCW 90.44.100(3) is with the water right permit or certificate holder asserting an amendment pursuant to RCW 90.44.100(3).*
