

Adaptation and Remediation Priorities – Developed in July 2014

Priority	Proposal	Blue Ribbon Panel action(s)
Seaweed cultivation	Build on current work to assess the effectiveness of seaweed cultivation and harvest as an ocean acidification mitigation strategy. <i>(Grant provided by Paul Allen Foundation.)</i>	6.1.1 [KEA]
Ocean acidification refuges	Apply multiple remediation strategies within three specific bays and inlets and assess their effectiveness in order to proactively develop ocean acidification refuges.	6.3.2 [KEA]
Native oyster restoration	Provide funding to: <ul style="list-style-type: none">▪ Re-establish native oyster breeding populations in 19 priority areas▪ Investigate the capacity of native oyster beds to increase ocean acidification resilience	6.3.3 6.3.4
Genetic adaptation in keystone species	Research the capacity for genetic adaptation to ocean acidification in keystone and commercially important species within Washington waters.	6.3.5
